

## The GREEN

The original green was three rinks wide, a fourth rink was added by the members in 1979 and two more were professionally installed in 1987 at a cost of £13,400.

A water sprinkling system for the newly enlarged green was installed at a cost of £4,600 in 1990.

The original mower, which was second hand, was bought in 1947 for £45 from Seale Parish Council, who had used it until then on our green.

Since that time the club has bought a number of mowers culminating in recent times in the purchase of a splendid new cassette mower system (bought with a generous interest free loan from one of our members) to aid our greenkeeper in the maintenance of our greatest asset- our green.
